TOUCHVIEW ULTRA SERIES GEN 6

One Panel. Every Room.

The new **TouchView ULTRA Series Gen 6** is the next generation of interactive panels for education and business. Four sizes, crisp 4K detail and 50 points of touch put the whole room in the conversation, with a remote that matches the panel controls so anyone can use it on day one.

FUTURE-READY

4K clarity and 50-point touch for large groups.

TRUSTED

Google EDLA certified, with Google apps and Play Store.

SECURE

TouchView MDM and GDPR compliance protect every device.

FLEXIBLE

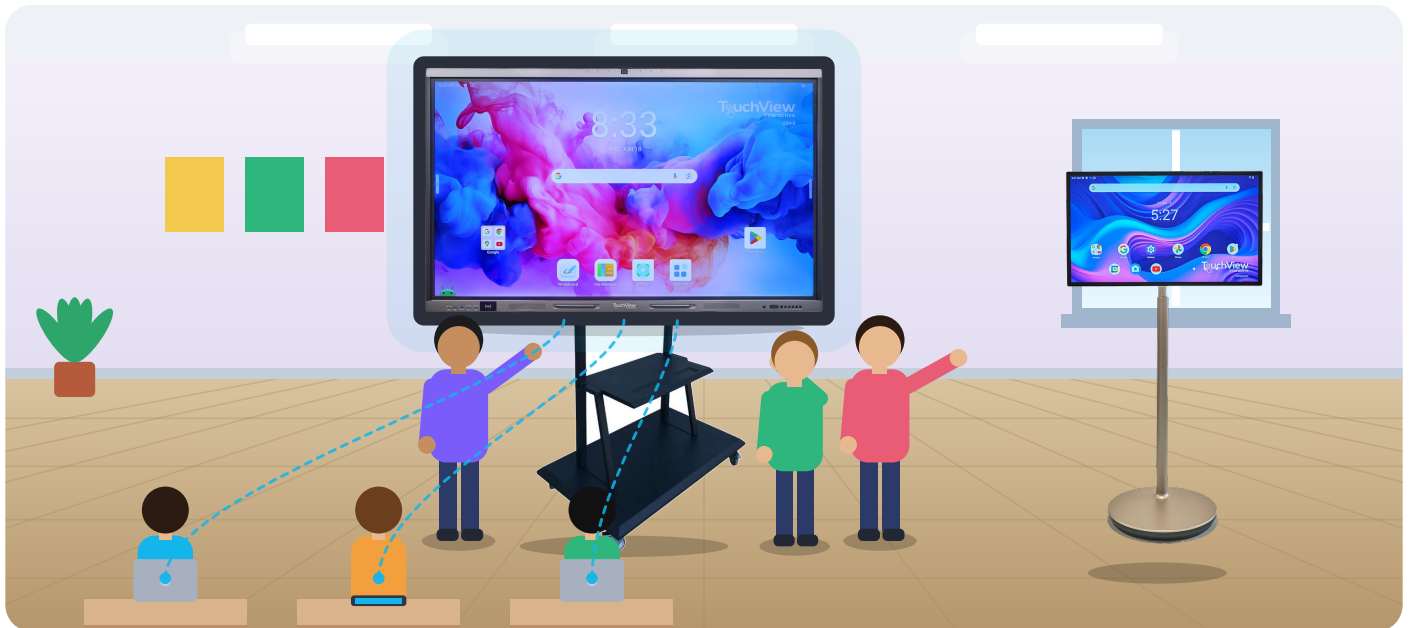

Works with Windows, Mac and Chrome, plus a Windows OPS PC option.

USE CASES

ULTRA Series Gen 6 in the Classroom

Whole-class instruction. With a wide variety of screen sizes and robust screen sharing that supports up to 50 different devices at once, the ULTRA Series Gen 6 ensures every student can see, share, and collaborate.

Hands-on group work. 50 points of touch let several students work at the panel at once, while a TouchView Companion portable display brings a second screen to the group.

Illustrations are for concept purposes only.

ULTRA SERIES GEN 6 ADD-ONS

Windows OPS PC and Gen 6 Remote

Windows OPS PC

The ULTRA Series Gen 6 is available with a Windows OPS slot-in PC. The Open Pluggable Specification is the Intel standard and allows a variety of options for chipset, memory and storage.

Core i5 module: 13th Gen Intel Core i5 processor, 8GB 2400MHz DDR4 (up to 32GB), 128GB SSD (up to 512GB), 4K at 60Hz, HDMI out.

Core i7 module: 13th Gen Intel Core i7 processor, 8GB 2400MHz DDR4 (up to 32GB), 128GB SSD (up to 512GB), 4K at 60Hz, HDMI out.

Remote

Gen 6 Remote

Now with Google voice activation

The Gen 6 remote now includes a Google voice activation feature. Press the dedicated microphone button and speak, so getting things done on the panel is as simple as asking.

● Google voice activation

ULTRA SERIES GEN 6

Certified, Secure and Managed

Google EDLA certified

TouchView ULTRA Series Gen 6 panels are Google EDLA (Enterprise Device Licensing Agreement) certified, so schools and businesses can deploy them with confidence alongside the Google apps and Play Store built into the panel.

TouchView MDM: Remote Device Management

DISTRIBUTION

Distribute and manage settings, policies, apps and content with uniform updates.

CONTROL

Granularly manage device restrictions at different levels.

MONITORING

Monitor device use and act remotely in case of loss or theft.

SECURITY

Complies with GDPR requirements, protecting devices from improper use.
