

TouchView[™] Interactive **LITE SERIES**

The power of anytime, anywhere learning in a streamlined budget friendly package

Ultra High Definition 4K resolution

Responds to twenty simultaneous points of touch

The Lite Series from TouchView Interactive now makes it possible to have all the power and flexibility of digital collaboration in a streamlined and scalable package. Designed to be affordable and easy to use in both Education and Corporate environments.

The Lite Series features stunning 4K UHD resolution, 20 points of touch and compatibility with all common operating systems and unified communication platforms.

Simply connect your device to begin taking advantage of our large format touch display. With the available slot-in PC module users can access the Windows 10 environment including our popular Qwizdom OKTOPUS and Mimio Connect platforms for content creation, presentation, and sharing. The Lite Series is the perfect budget friendly solution for districts looking to add touch interactivity to Windows, IOS, and Chrome devices.
